

PROBLEM STATEMENT

A role-based quiz platform for structured assessments

QuizArena is an internal assessment tool that allows organisations to create, schedule, and deliver timed multiple-choice quizzes to participants. It supports three distinct roles — **Admin**, **Instructor**, and **Participant** — each with a dedicated set of capabilities. Quizzes run on a strict schedule with an auto-submit mechanism when time expires, ensuring fair and consistent assessments across all users.

USER ROLES & RESPONSIBILITIES

**Admin**
Full platform control

- Create, delete, schedule and reschedule quizzes across all instructors
- Assign Instructor role access to any registered user.
- View detailed results and per participant score breakdowns

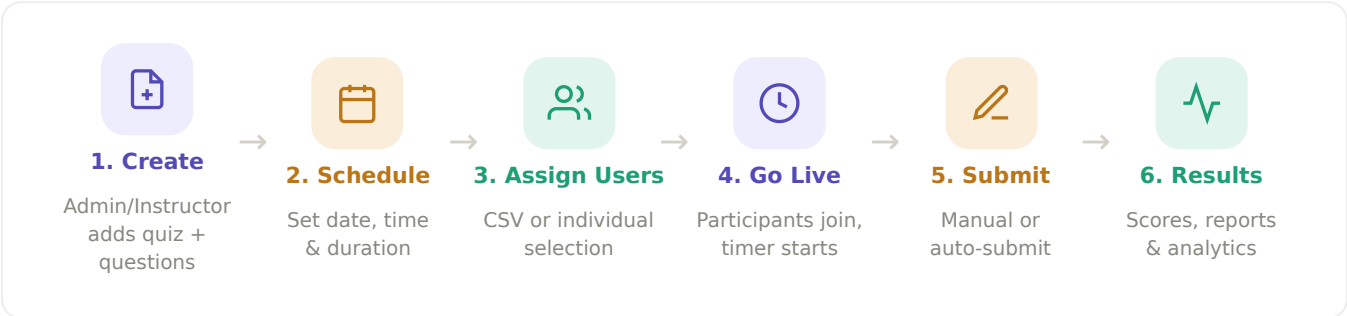

**Instructor**
Quiz creator & manager

- Update quiz content and reschedule their assigned quizzes
- Add questions manually or bulk-import via CSV
- Add participants via CSV or individually from registered users
- Remove participants before the quiz goes live
- View detailed results and per-participant score breakdowns

**Participant**
Quiz taker (default)

- Quiz auto-submits on expiry · partial answers saved
- Personal dashboard: upcoming, completed history, scores
- Analytics: attempted vs missed, average score trend

CORE QUIZ LIFECYCLE

QUIZ RULES & CONSTRAINTS

1

MCQ Format Only
All questions are multiple-choice — **Single Select** (radio) or **Multi Select** (checkboxes).
No open-text or true/false questions.

2

Timed with Auto-Submit
Every quiz has a fixed duration. A visible countdown timer runs throughout. When time reaches zero, quiz is **automatically submitted** with all answered questions saved.

3

Assigned-Only Access
Participants only access quizzes they are **explicitly assigned to**. No notification — the quiz appears in their Upcoming or Live section automatically.

4

Scheduled Windows
Quizzes are only accessible during their **scheduled window**. Participants cannot start early or after expiry. Expired quizzes are locked permanently.

5

Role-Based Access Control
Admins assign Instructor roles. All sign-ups are Participants by default. Instructors manage only their own quizzes. Admins see everything.

6

One Attempt Per User
Each participant gets a **single attempt** per quiz. Once submitted — manually or via auto-submit — the quiz is locked and score recorded permanently.

FUNCTIONAL REQUIREMENTS

1 • Authentication & Onboarding

1.1

Users register with name, email, and password. Participant is assigned as the default role.

1.2

Login is email + password; no SSO or OTP in scope.

1.3

Admin can upgrade any registered user to Instructor from the User Management screen.

1.4

A user demoted from Instructor loses quiz creation access but retains their participant history.

2 • Quiz Creation Flow

2.1

A quiz is created in **Draft** state — invisible to participants until published and scheduled.

2.2

Instructor sets: title, description, question type (Single or Multi Select), duration, and schedule (date + time).

2.3

Questions can be added after creation — a quiz does not need questions to be saved as Draft.

2.4

CSV question format: one row per question with question text, options A/B/C/D, and correct answer(s).

2.5

A quiz must have at least one question and a scheduled date before it can be published.

3 • Participant Assignment Flow

3.1

Instructor adds participants to a specific quiz — not to the platform globally.

3.2

CSV import format: one column listing registered email addresses.

3.3

Individual add: Instructor searches by name or email from registered users.

3.4

Emails in CSV not registered on the platform are skipped and flagged in an error summary.

3.5

Participants can be removed from a quiz any time before it goes Live; not after.

4 • Quiz Visibility & States

- 4.1 Quiz states flow in sequence: **Draft** → **Scheduled** → **Live** → **Completed** → **Expired**.
- 4.2 A Scheduled quiz becomes Live automatically at the set date and time.
- 4.3 Assigned participants see the quiz in **Upcoming** before the start time and **Live** during the active window.
- 4.4 A quiz moves to **Completed** once submitted; to **Expired** if the window closes without a submission.
- 4.5 Participants cannot see quizzes they have not been assigned to.

5 • Quiz Taking Flow

- 5.1 A participant can only enter a quiz during the Live window.
- 5.2 Timer starts the moment the participant opens the quiz — not at the scheduled start time.
- 5.3 Participants can navigate between questions freely within the session.
- 5.4 A question answered and revisited retains the last selected option.
- 5.5 On manual submit, a confirmation prompt appears before final submission.
- 5.6 On auto-submit, the system saves all answered questions at that instant and locks the session.

6 • Results & Reporting

- 6.1 Score is calculated immediately after submission and displayed to the participant.
- 6.2 Participant result report shows: overall score %, correct, wrong, skipped counts, time taken, and per-question review with their answer vs the correct answer.
- 6.3 Instructor and Admin see a results table per quiz: name, score, time spent, submission time, status.
- 6.4 Results are read-only — no re-grading or editing after submission.

7 • Admin Controls

- 7.1 Admin can delete a quiz in any state except Live.
- 7.2 Admin can reschedule a quiz only if it is in Scheduled state (not yet live).
- 7.3 Admin cannot take quizzes themselves.

Light Theme

The image shows a 'QuizArena' application in the 'Edit Quiz' state. A modal titled 'Add Question' is open, with a subtitle 'HTML5 Semantic Elements - #Q009'. The modal contains a text input field for the question, currently showing a placeholder 'Enter your question here...'. Below this are four input fields for answer options, labeled A, B, C, and D, each containing the text 'Option A' through 'Option D' respectively. At the bottom, there is a 'Correct Answer' section with a radio button selection for each option. The modal has 'Cancel' and 'Add Question' buttons at the bottom right. The background shows a sidebar with 'Dashboard', 'Available Questions', 'Analytics', and 'Logout' options.

Dark Theme

The image shows the same 'QuizArena' application in the 'Edit Quiz' state, but with a dark theme. A modal titled 'Edit Question' is open, with a subtitle 'HTML5 Semantic Elements - #Q009'. The modal contains a text input field for the question, currently showing the text 'Which HTML5 element defines the main content of a document?'. Below this are four input fields for answer options, labeled A, B, C, and D, each containing the text '<section>', '<main>', '<article>', and '<div>' respectively. At the bottom, there is a 'Correct Answer' section with a radio button selection for each option. The modal has 'Cancel' and 'Save Changes' buttons at the bottom right. The background shows a sidebar with 'Dashboard', 'Available Questions', 'Analytics', and 'Logout' options.
